.Net/Blazor/MinimalAPI/Aspire/CLI/OSS

.NetFramework/Reflection

XAML/MVVM

목차

- 발표자 소개
- *~서론~*
- 실현
 - JamesNK/aspnetcore-maui
 - #net10 #blazor
 - gosuda/portal
 - Issues & Todos

서론: 디지털 넝마주이-주의

“

고도로 발달한 거지는 환경운동가와 구분할 수 없다

○ 1

↑ 5,766

♡ 2,100

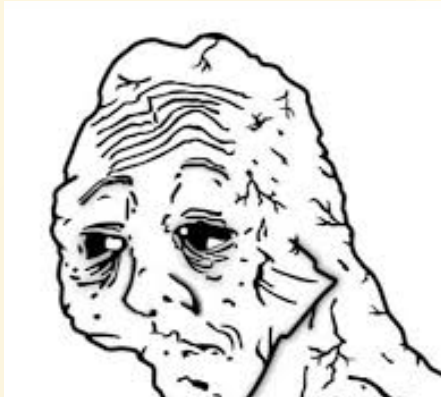

↑

”

No More GPU
No More RAM
No More Job
No Money(always)
No Coin
No Stock
No Token
No House
No Hope
No Life
No Gf

기술발전끝에 소비자손에 남는건
제조사가 내다버린 구형장치 뿐

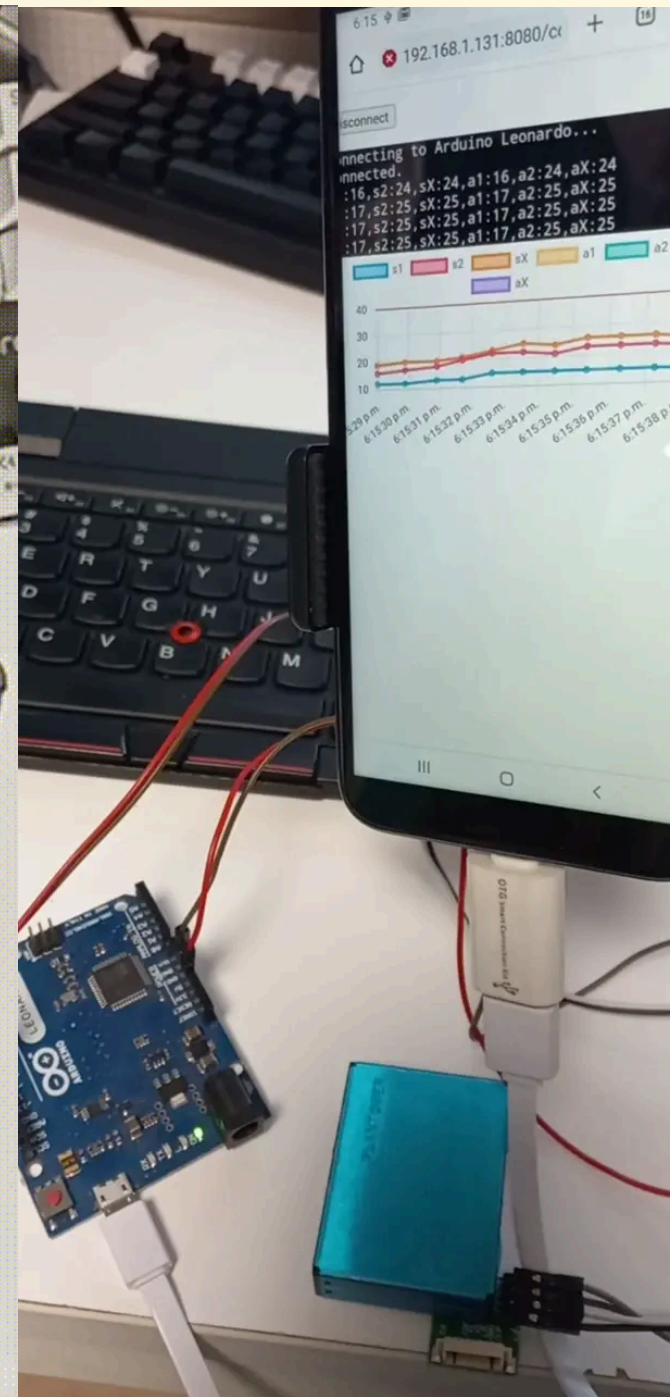

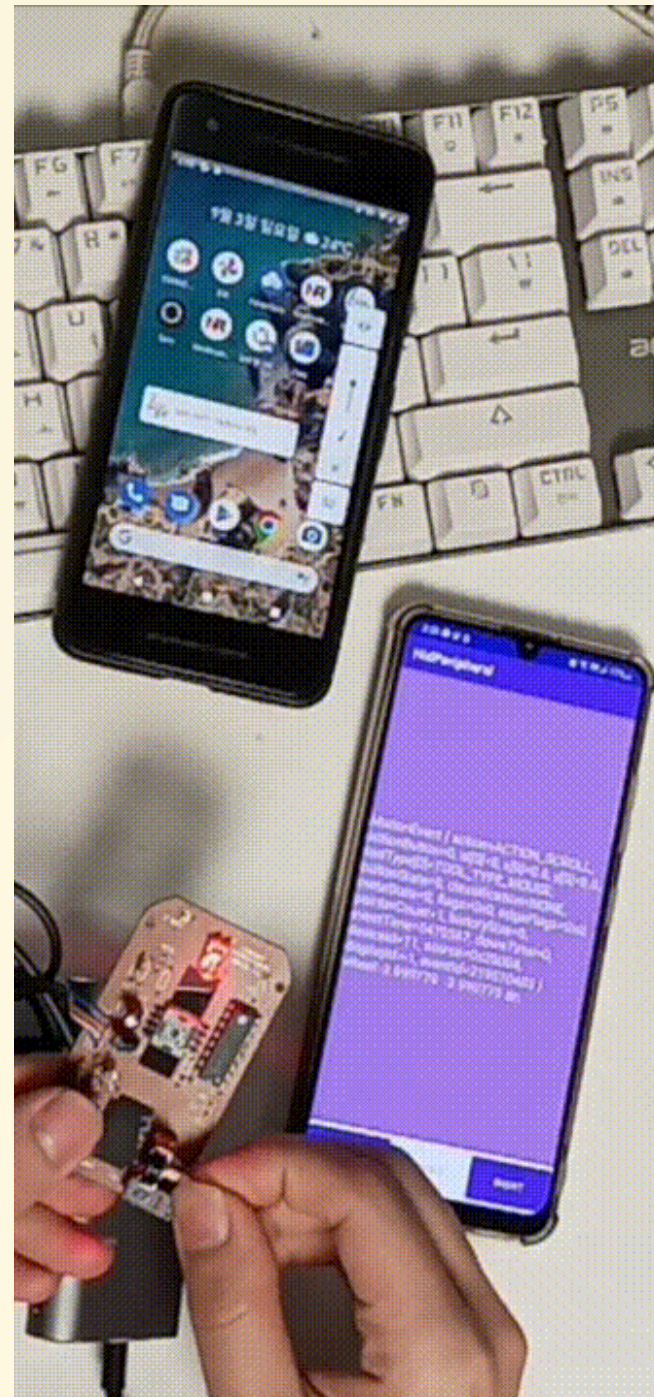

재활용의 의무

안쓰는 휴대폰 cctv 만들기

▶ 공기계로 마크서버 운영하기

Google Paper Phone

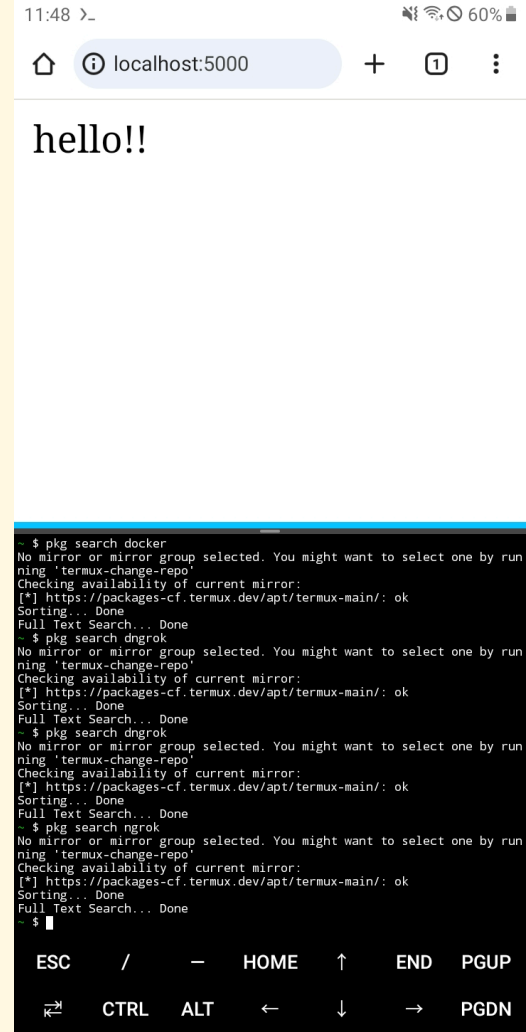

쉽지만 번거로운 폰서버 운영

플랫폼	이용절차
app	app설치>실행
container	docker설치> <code>docker run ..@latest</code>
termux	fdroid설치>termux설치>실행> <code>sshd</code> > <code>pkg install proot-distro ..</code> >tasker, widget 등 추가 플러그인 앱 설치해 관리..   

“ 아예 서버도 애플리케이션으로 패키징 하여
 누구나&반복적으로 활용할수 있게 해야한다!

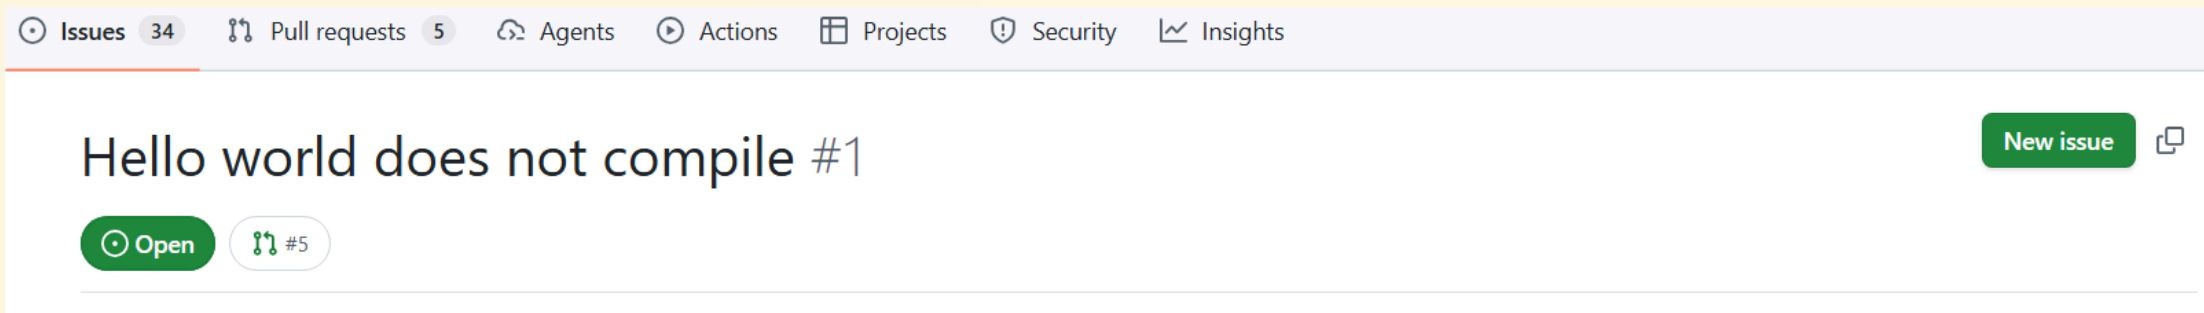

”

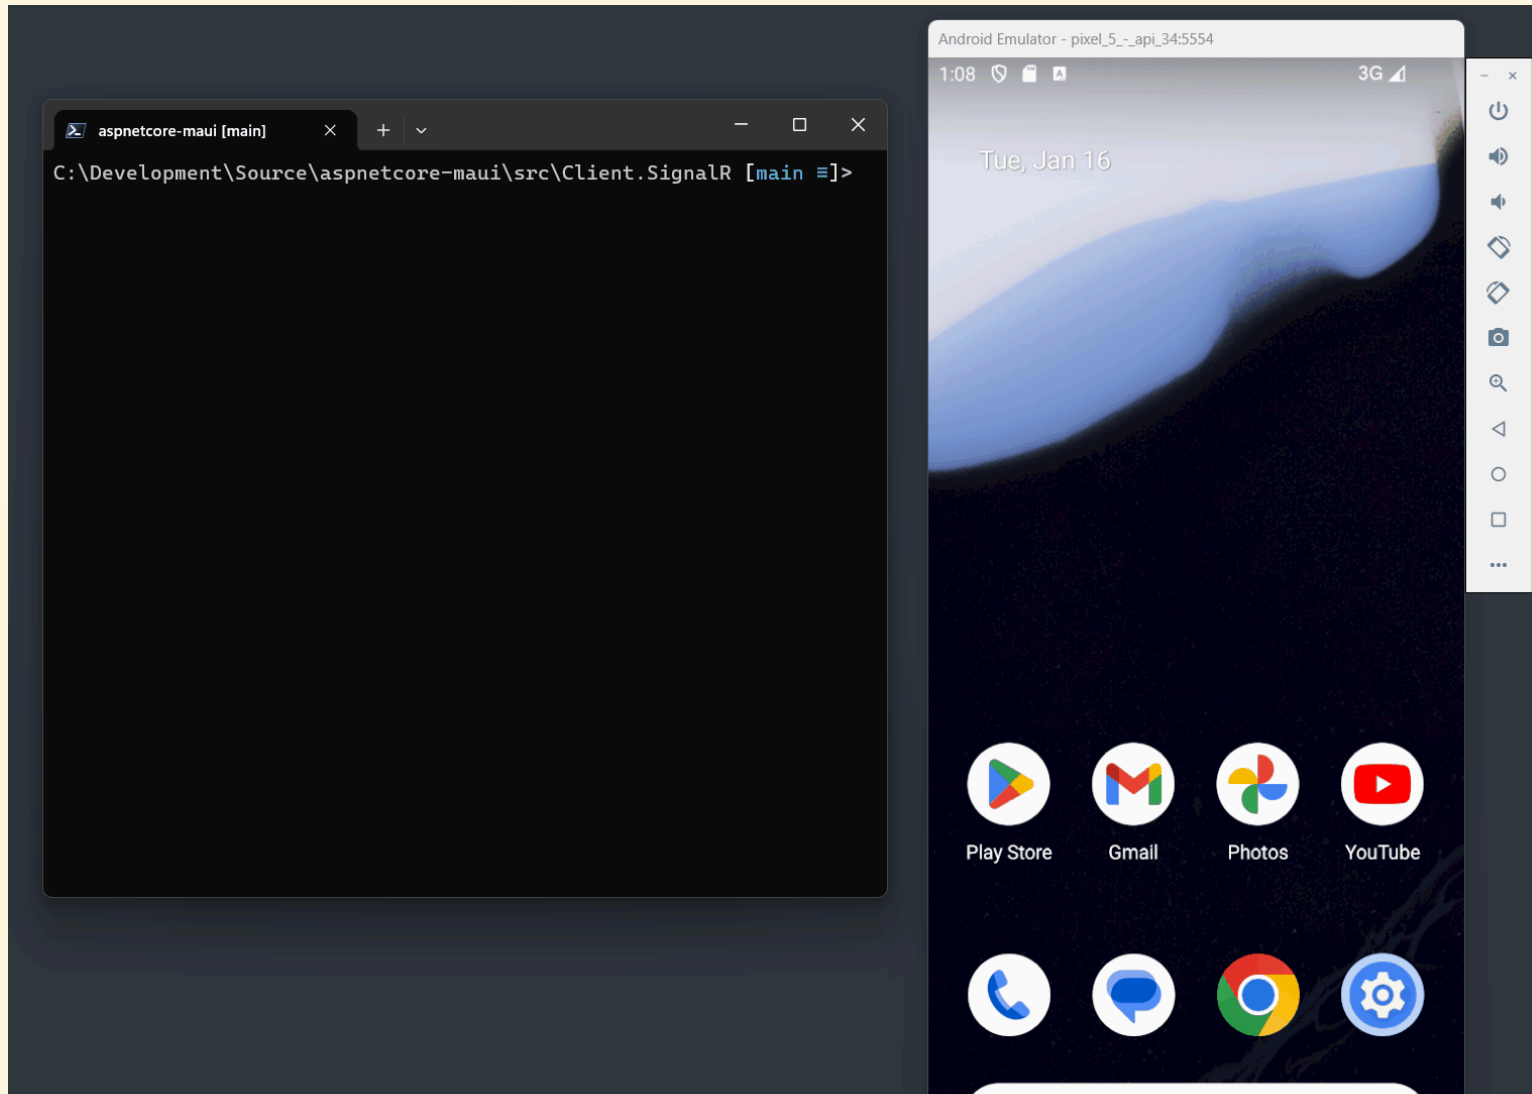

안되는걸 되게 해야하는걸 되게 만들기

닷넷으로 웹서버개발도 되고 모바일개발도 되면,
모바일 웹서버도 당연히 될수 있는것이 아닌가?

- `Microsoft.NET.Sdk.Web` 은 `net*-android` 타겟 등을 지원하지 않음
- 임의로 참조시 컴파일 에러 발생

JamesNK/aspnetcore-maui

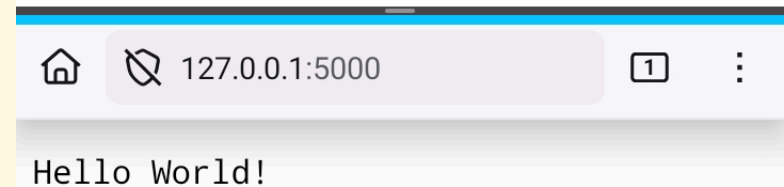

Home

Brum, brum!!!

I'm a MAUI web server!

info: Request finished HTTP/1.1 GET http://

35.9317ms

#net10

```
<PropertyGroup>
+ <TargetFrameworks>net8.0-android</TargetFrameworks>
- <TargetFrameworks>net10.0-android</TargetFrameworks>
..
<ItemGroup>
  <PackageReference Include="Microsoft.Maui.Controls" Version="$(MauiVersion)" />
  <PackageReference Include="Microsoft.Maui.Controls.Compatibility" Version="$(MauiVersion)" />
- <PackageReference Include="Microsoft.Extensions.Logging.Debug" Version="8.0.0" />
+ <PackageReference Include="Microsoft.Extensions.Logging.Debug" Version="10.0.3" />
</ItemGroup>

<ItemGroup>
  <ProjectReference Include="..\MauiApp.Web\MauiApp.Web.csproj" />
  <Reference
- Include="C:\Program Files\dotnet\shared\Microsoft.AspNetCore.App\8.0.0\*.dll"
- Exclude="C:\Program Files\dotnet\shared\Microsoft.AspNetCore.App\8.0.0\aspnetcorev2_inprocess.dll">
+ Include="C:\Program Files\dotnet\shared\Microsoft.AspNetCore.App\10.0.3\*.dll"
+ Exclude="C:\Program Files\dotnet\shared\Microsoft.AspNetCore.App\10.0.3\aspnetcorev2_inprocess.dll">
  </Reference>
</ItemGroup>
```

#blazor

```
...
  <ImplicitUsings>enable</ImplicitUsings>
+ <GenerateEmbeddedFilesManifest>true</GenerateEmbeddedFilesManifest>
</PropertyGroup>
+ <ItemGroup>
+ <Content Remove="wwwroot/**" />
+ <EmbeddedResource Include="wwwroot/**" />
+ <PackageReference Include="Microsoft.Extensions.FileProviders.Embedded" Version="10.0.3" />
+ </ItemGroup>

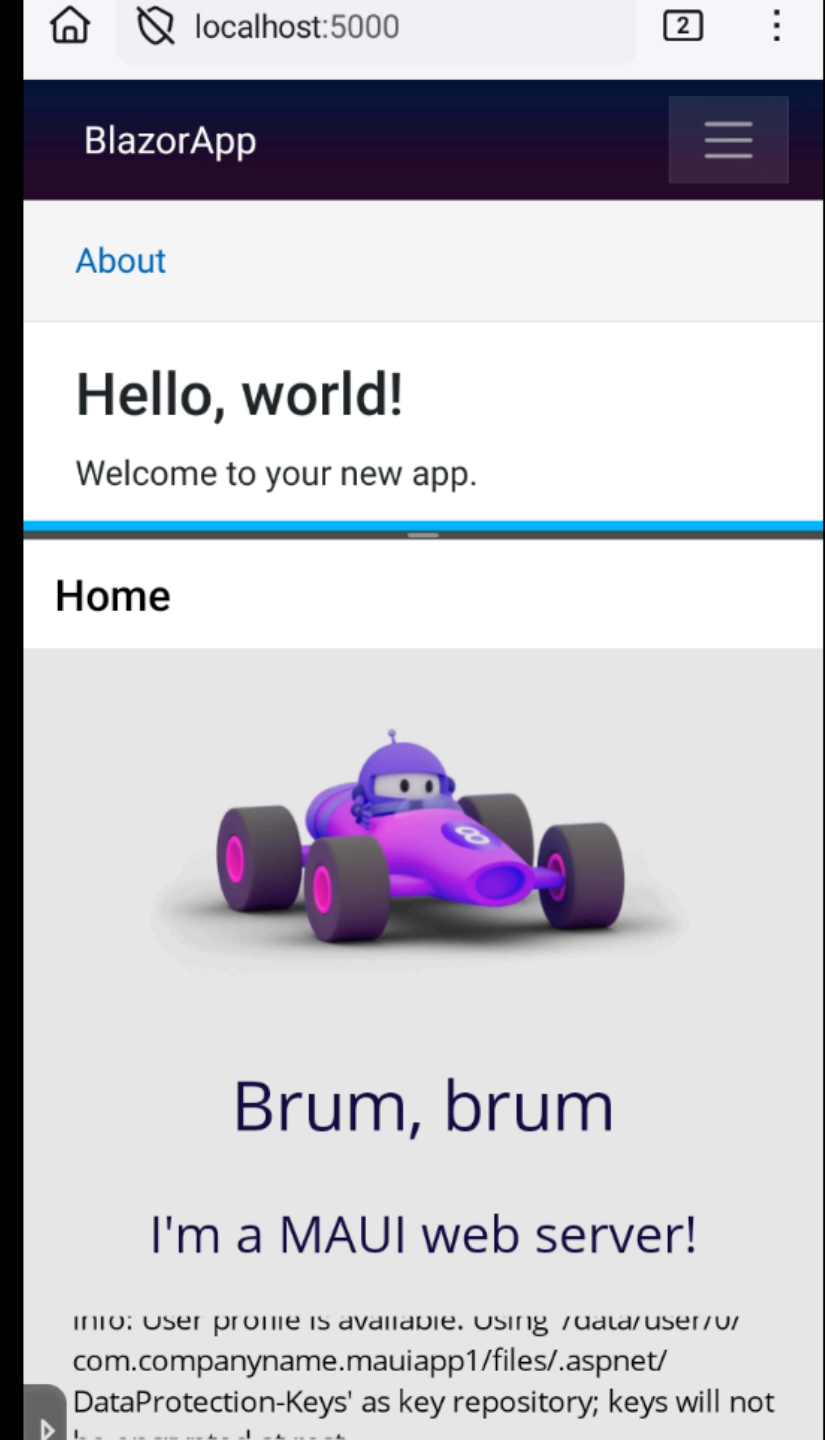

<ItemGroup>
...
  <Reference
    Include="C:\Program Files\dotnet\shared\Microsoft.AspNetCore.App\10.0.3\*.dll"
    Exclude="C:\Program Files\dotnet\shared\Microsoft.AspNetCore.App\10.0.3\aspnetcorev2_inprocess.dll">
    <Private>False</Private>
    <CopyToOutputDirectory>Never</CopyToOutputDirectory>
  </Reference>
+ <Reference
+ Include="..\BlazorApp\bin\Release\net10.0\BlazorApp.dll">
+ <Private>False</Private>
+ <CopyToOutputDirectory>Never</CopyToOutputDirectory>
+ </Reference>
</ItemGroup>
```

Build & Run

SM-J415N (Galaxy J4+) armv7l 기준 명령줄

```
dotnet --version # 10.0.103

git clone https://github.com/naratteu/aspnetcore-maui -b blazor
cd aspnetcore-maui
dotnet new blazor -o src/BlazorApp
dotnet publish src/BlazorApp
cp -r src/BlazorApp/bin/Release/net10.0/publish/wwwroot src/MauiApp.Web
cd src/MauiApp
dotnet workload restore
dotnet build -f net10.0-android -t:InstallAndroidDependencies
dotnet watch -f net10.0-android -r android-arm
```

실현

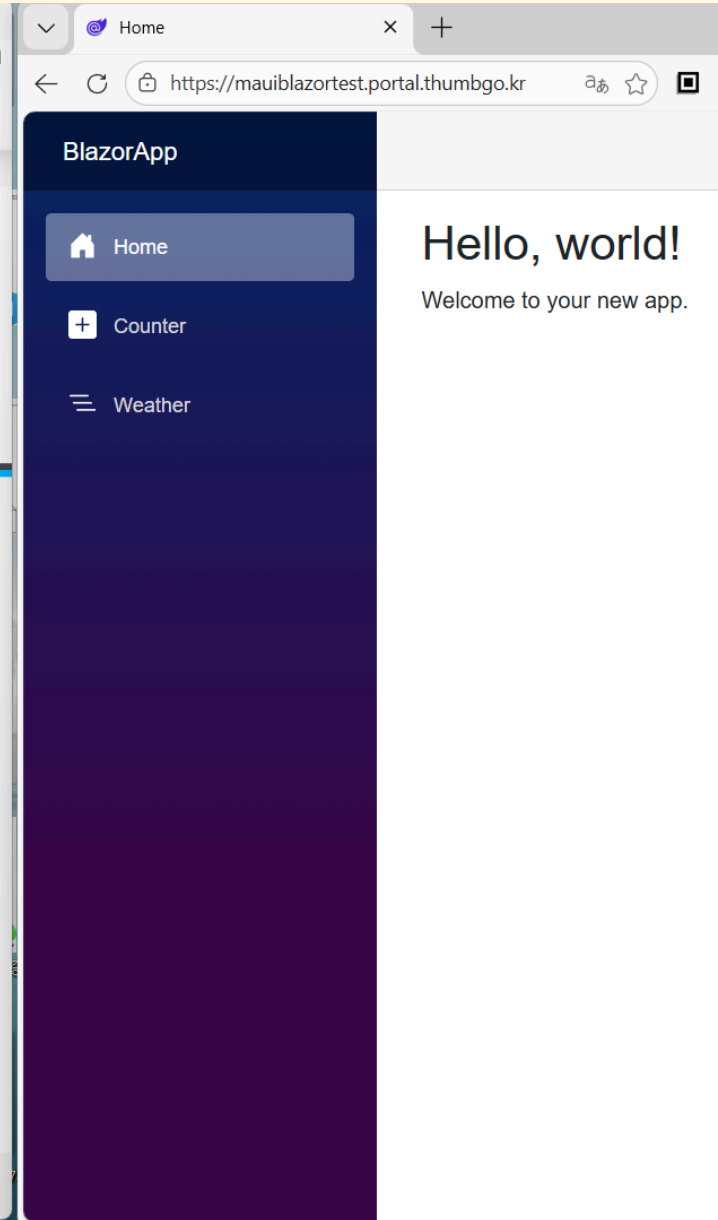

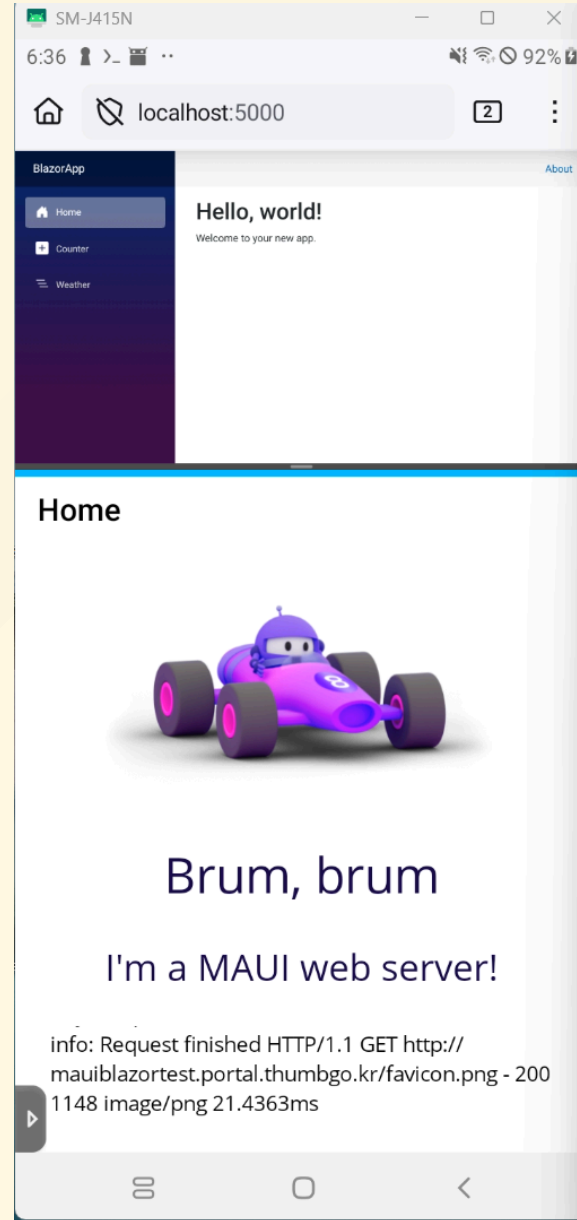

여기서 끝이 아니다!

#portal

```
git clone https://github.com/naratteu/aspnetcore-maui -b portal
cd aspnetcore-maui
dotnet publish src/BlazorApp
cd src/MauiApp
dotnet workload restore
dotnet build -f net10.0-android -t:InstallAndroidDependencies
sdkmanager "ndk;29.0.14206865" # maui가 설치한 android-sdk 에서 ndk추가

cd ../PortalLib
go env -w CGO_ENABLED=1
go env -w CC=~~~abspath~~~.android-sdk/ndk/~/armv7a-linux-androideabi21-clang
go env -w GOOS=android
go env -w GOARCH=arm
go build -buildmode=c-shared -o ../MauiApp/Platforms/Android/libs/armeabi-v7a/libportal.so

cd ../MauiApp
dotnet watch -f net10.0-android -r android-arm
```

gosuda/portal

- `ngrok`, `cloudflared tunnel` 등의
오픈소스 대안
- 에이전트 설치과정없이
명령줄에서 즉시접속
- 누구나 포탈 운영가능 &
서버를 여러 포탈에 동시배포
- sdk로 서버에 내장 가능

Issues

- 빌드파이프 간소화
 - hot reload ?
- 크로스플랫폼or컨테이너 빌드
 - [jamesnk/net90](https://github.com/jamesnk/net90)
- IOS 지원
 - blazor AOT빌드 지원 필요
 - [Photino.Blazor.NativeAOT](https://github.com/Photino/Blazor.NativeAOT)
 - net11에서 지원되길 기원

Todos

- 휴대폰 기능과 연동
 - 부팅시 실행
 - 스토어를 통한 서버 업데이트
 - [포그라운드 서비스](#)
 - 카카오톡 챗봇
- Portal 활용
 - 서버 url지정
 - 다중 릴레이 연동

...Thanks!

감사합니다.
